Dear Mr. Pronczak;

Enclosed is the above referenced permit, which authorizes the discharge of storm water from the construction activity, described in the adequate erosion and sediment control plan of July 29, 2011, and the permit application. Please ensure that the erosion and sedimentation control plan that has been determined to be adequate is fully implemented and available at the construction site.

The Montgomery County Conservation District reviewed the erosion and sedimentation control plan to determine whether it is adequate to satisfy the requirements of Chapter 102, Erosion and Sediment Control Rules and Regulations. The Montgomery County Conservation District assumes no responsibility for the implementation of the plan, or the proper construction, operation, and maintenance of the facilities contained in the plan.

Please read carefully Parts A, B, and C of the permit which details the terms and conditions of this authorization. Conservation District staff and/or representatives of the Department of Environmental Protection may inspect this earth disturbance activity to determine compliance with applicable permit requirements, Chapters 92, 101, and 102 Rules and Regulations and the Clean Streams Law.

Permit requirements and federal regulations at 40 C.F.R. S122.21(b) require that "when a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit". Please be advised that once a contractor has been selected for the project, they must either be added on to the permit as a co-permittee or have the permit responsibility transferred to them. This office must receive the co-permittee/transferee form no later than 30 days prior to the co-permittee/transferee action-taking place. The enclosed form must be used to add the co-permittee/transferee.

Enclosed also is a Notice of Termination (NOT) form to be completed and filed with the Conservation District once construction activities have ceased and final stabilization has been achieved.

The Montgomery County Conservation District and/or the Southeast Regional Office of the Department of Environmental Protection Soils and Waterway Section must be notified by telephone or certified mail at least seven days prior to the start of construction.

Please be advised that a pre-construction meeting is requested. When the date of the meeting is selected, please contact the district representative whose signature appears below.

This authorization does not relieve the applicant from applying for and obtaining any and all additional permits or approvals from local, state, or federal agencies for the construction activity described in the permit application.

If you have any questions regarding this permit, please contact the Montgomery County Conservation District.

Sincerely,

Daniel Oskiera
Erosion & Sediment Control Technician
